

WRI

WRI

Electronic import of Works and Rights Information between your Company's database and AGICOA's to declare and/or to update your work and rights.

- The works and rights you wish to declare and/or update at AGICOA **are stored at your end in a database** (Oracle, MS-Access, etc ...). WRI our electronic format will allow us to import those data from your system to our Register;
- Whatever your data volume, but used **especially for mass-declarations**, if it is stored in a database, WRI might be a practical format in which to send us your data;
- You may use WRI to allow us to download your declarations automatically into IRRIS online services where, from your account, you will be able to query them after proper validation process;
- Should you have any questions, **a contact at AGICOA** is available to guide you through WRI at irrishelp@agicoa.org.
