IRRIS Import/Export Procedure

WORK DECLARATIONS & RIGHTS

Standard data exchange - WRI 02.02

1 Scope

This document describes the data format used for import/export of Work Declarations & Rights within IRRIS.

Work Declarations & Rights are exchanged with AGICOA for the following processes:

- New Work Declarations & Rights registration;
- Work Declarations & Rights registry synchronisation.

Note for the Agents: Entities declaring on behalf of multiple rightsholders need to generate one WRI (**W**ork Declarations & **R**ights **I**mport) file per rightsholder.

2 Characteristics

This document details the exchange format for Work Declarations & Rights in accordance to the principles defined in the "IS&T procedure - Import/Export Process" document.

The exchange file is thus made of:

- a block header (containing the message reference and version number);
- a block content (described further in this document);
- a block footer.

2.1 File naming convention

Structure of file name must be as follow:

<AGICOA Rightsholder number>_<Format version>_<incremental number>.xml

<AGICOA Rightsholder number> is the Rightsholder number given to you by AGICOA when you first register as a rightsholder.

<Format version> is WRI0202

<Incremental number> is a number on 8 digits.

The uniqueness of the file name is mandatory.

I.e. if your AGICOA rightsholder number is 445566, your first WRI file will be named:

445566_WRI0202_00000001.xml

IRRIS Import/Export Procedure

WORK DECLARATIONS & RIGHTS

Standard data exchange - WRI 02.02

2.2 Mandate

When you send a WRI file to your portfolio manager, make sure that the header of the file contains the following sentence in the <Extensions> section of the header:

By using WRI, declarant recognizes having read and accepted the terms and conditions of the Mandates: http://www.agicoa.org/english/rightsholder/wri/WRI_mandate_v1_8_0.pdf, as selected for each work hereby declared.

So the header must be as follows:

```
<?xml version="1.0"?>
<Data>
  <Header>
    <Version>WRI 02.02</Version>
    <FromCompany>ABC Test Company</FromCompany>
    <FromPerson>John Doe</FromPerson>
    <ToCompany>AGICOA</ToCompany>
    <ToPerson>Caroline Famel</ToPerson>
    <BegDate>2018/02/25</BegDate>
    <BegTime>16:10:46</BegTime>
    <Extensions>By using WRI, declarant recognizes having read and accepted the terms and conditions of the Mandates:
http://www.agicoa.org/english/rightsholder/wri/WRI\_mandate\_v1\_8\_0.pdf, as selected for each work hereby declared. </Extensions>
  </Header>
```

Note that if the header is missing this sentence, or if the sentence is not exactly as stated here, the file will be rejected with a fatal error and the WRI file will not be loaded.

This sentence testifies you mandate AGICOA as per related mandate that can be downloaded at: http://www.agicoa.org/english/rightsholder/wri/WRI_mandate_v1_8_0.pdf

3 Message Reference & Version number

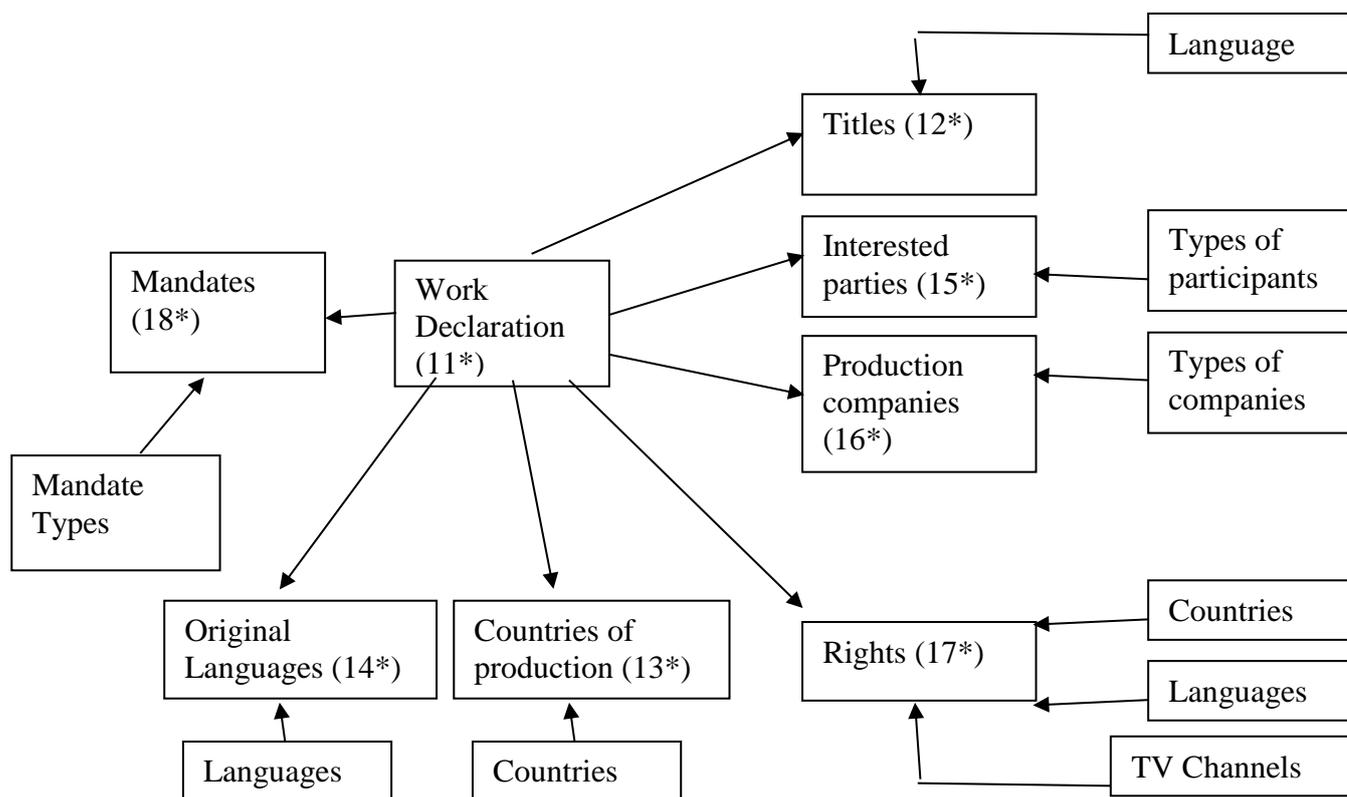

This standard data exchange for Work Declarations & Rights is identified by the following message reference and version number:

WRI 02.02

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

4 Data description

Each Work Declaration will be represented by multiple records of multiple types corresponding to the following entity/relationship general model:

* Refer to flat file format, see 6.1

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

4.1 Definition of a Work Declaration

A Work Declaration is an entity composed by multiple titles (in different languages), multiple countries of production, multiple original languages, multiple participants (interested parties), multiple production companies, and multiple rights.

For serials, individual episodes are considered **as independent Work Declarations**, so that, within the same serial, one might register for episodes 1 to 10, and not for episodes 11 to 20. *Serials are composed of a Serial Header (i.e. Generic title), there might be Seasons related to that serial header and episodes that might be related to a season or directly to the serial header. The way to declare serials is further explained in a separate document: Annex F - AGICOA series interpretation examples.pdf.*

4.2 General characteristics of a Work Declaration

This record is mandatory.

Each Work Declaration **must** have **one and only one** record of type "11" described below, and each declaration **must begin** with this record type:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "11";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Contains the unique Work Declaration Identifier of the Sender;
3	Work Declaration No (Receiver)	Text (max.50)	Optional. Contains the unique Work Declaration Identifier of the Receiver. When a rightsholder sends a file to AGICOA, this field must contain AGICOA's unique Work Declaration Number for updates and withdrawal of existing Work Declaration. Format (D-999999999);
4	Serial Level	Number (fix. 1)	Optional. For Work Declarations of type "SE" (serial) only. This field is only available and required for serial Work Declarations and shows the level. Possible values: 1 = "Serial" 2 = "Season" 3 = "Episode";
5	Serial No Sender	Text (max.50)	Optional. Contains the sender serial unique Identifier. When declaring a season or an episode, this field must contain the sender serial header unique identifier, to be able to link the season or the episode to a given serial header. When serial level is set to 1 (<i>Serial</i>), this field will be empty;
6	Serial No Receiver	Text (max.50)	Optional.

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

			Contains the receiver serial unique Identifier. When a rightsholder sends a file to AGICOA, this field must contain AGICOA's unique serial Work Declaration Number for updates and withdrawal of existing episodes or seasons;
7	Season No Sender	Text (max.50)	Optional. Contains the sender season unique Identifier. When declaring an episode, this field must contain the sender season unique identifier, to be able to link the episode to a given season. If episode does not belong to any season, field remains empty. When serial level is set to 1 (<i>Serial</i>), or 2 (<i>Season</i>), this field will be empty;
8	Season No Receiver	Text (max.50)	Optional. Contains the receiver season unique Identifier. When a rightsholder sends a file to AGICOA, this field must contain AGICOA's unique season Work Declaration Number for updates and withdrawal of existing episodes;
9	Season No	Integer (max. 3)	Optional. Number of the current season (i.e. first season: 1, second season: 2, etc...).
10	Episode No	Integer (max. 6)	Optional. Number of the current episode.
11	Total Season	Integer (max. 6)	Optional. If the serial level is set to 1 (<i>Serial</i>), this number represents the total number of seasons belonging to this serial. When Serial level = 2 or 3 (<i>Season or Episode</i>), this field will be empty.
12	Total Episode	Integer (max. 4)	Optional. If the serial level is set to 1 (<i>Serial</i>) or 2 (<i>Season</i>), this number represents the total number of episodes belonging to this serial or season. When Serial level = 3 (<i>Episode</i>), this field will be empty.
13	Duration	Integer (max. 999)	Mandatory. Duration of the Work Declaration expressed in minutes;
14	Type	Text (fix. 2)	Mandatory. According to AGICOA's regulations (2 alphabetical positions). Possible values: FF = "Feature Film"

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

			TF = "Telefilm" SH = "Short Film" SE = "Serial";
15	Kind	Text (fix. 2)	Mandatory. According to AGICOA's regulations (2 alphabetical positions). Possible values: FI = "Fiction" NF = "Non Fiction" AN = "Animation";
16	Year of production	Integer (max. 4)	Mandatory. 4 digits;
17	ISAN	Text (max. 26)	Optional. International Standard Audiovisual Number as registered at ISAN International Agency. This field may only contain a 12 or 26 long string of characters (no "-" and no spaces). 26 characters entries will be checked for checksum compliance before being loaded in IRRIS. The following entry is recommended depending on the audio-visual type: <ul style="list-style-type: none"> ● Non-serial work and serial episodes: 26 character ISAN. ● Serial headers or seasons: the ISAN ROOT (first 12 characters). An episodic ISAN (any episode of the series) may also be entered here.
18	Withdrawal	Text (yes/no)	Optional. If not mentioned, default value will be "no". To withdraw an existing Work Declaration, the value must be "yes", and no rights must be declared together with this Work Declaration. All the rights in the AGICOA database will be deleted and Work Declaration will become INACTIVE.

4.3 Titles

This record is mandatory.

Each Work Declaration **must** have at least one original title.

Each Work Declaration might have multiple titles expressed in different languages.

Each record corresponding to the description of a title should be structured as follows:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "12";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

3	Original	Text (yes/no)	Mandatory. Is it the original title?;
4	Language code	Text (fix. 3)	Mandatory. Language code (ISO 639-2/B, 3A);
5	Title	Text (max. 100)	Mandatory. Any characters may be used in this field.

4.4 Countries of production

This record is mandatory.

A given Work Declaration might have multiple countries of production. Then, there should be one line for each according to the following record structure:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "13";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Country code	Text (fix. 2)	Mandatory. Country code (ISO 3166, 2A).

4.5 Original languages

This record is mandatory.

A given Work Declaration might have multiple original languages. Then, there should be one line for each according to the following record structure:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "14";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Language code	Text (fix. 3)	Mandatory. Language code (ISO 639-2/B, 3A).

4.6 Interested parties (participants)

This record is mandatory.

A given Work Declaration might have multiple interested parties.

One director is mandatory (interested party type 1).

Then, there should be one line for each according to the following record structure:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "15";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Interested parties type	Number (fix. 1)	Mandatory. Possible values: 1 = Director 2 = Actor 3 = Producer 4 = Character 5 = Distributor

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

			6 = Script writer 7 = Composer 8 = Screen writer 9 = Anchor 10 = Cinematographer;
4	Last name	Text (max. 25)	Mandatory. Last name (Family name);
5	First name	Text (max. 15)	Optional. First name or first name initial.

4.7 Company of Production

One Company of Production is mandatory.

A given Work Declaration might have multiple production companies. Then, there should be one line for each according to the following record structure:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "16";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Company type	Number (max. 1)	Mandatory. Possible value: 1 = Production company;
4	Company Name	Text (max. 100)	Mandatory;
5	By order	Text (yes/no)	Optional. Default value = no. Has anyone ordered the Work Declaration?;
6	Principal	Text (max. 100)	Optional. Mandatory when "By order" = yes. If order by = yes, name of the principal who ordered the Work Declaration.

4.8 Rights

This record is mandatory except when withdrawing a Work Declaration (withdrawal flag set to "yes").

A given Work Declaration might have multiple records of rights, expressed for different countries, languages, channels, percentages and periods of time. Then, there should be one line for each according to the following record structure:

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "17";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Rightsholder reference (Sender)	Text (max.50)	Optional. Contains the rightsholder reference (reference of the sender);
4	Rightsholder name (Sender)	Text (max. 100)	Mandatory;

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

5	Rightsholder reference (Receiver)	Text (max.50)	Optional. Contains the rightsholder reference (reference of the receiver);
6	Country of retransmission	Text (max. 2)	Mandatory. Country code (ISO 3166,2A). Contains a unique code for each record. If the right is defined for all countries then use "*";
7	Language code	Text (max. 3)	Mandatory. Language code (ISO 639-2/B, 3A). Contains a unique code for each record. If the right is defined for all languages then use "*";
8	TV Channel	Text (max. 10)	Mandatory. TV Channel code in AGICOA nomenclature (see annex D). Contains a unique code for each record. If the right is defined for all channels then use "*";
9	Percentage of right	Decimal (max. 100.00)	Mandatory. Percentage for this right; If the decimal part is 0, then it can be omitted (including the decimal point);
10	Rights From	Date (yyyy/mm/dd)	Mandatory. Date of the beginning of right;
11	Rights To	Date (yyyy/mm/dd)	Mandatory. Date of the end of right (9999/12/31 means perpetuity);
12	Validity From	Date (yyyy/mm/dd)	Mandatory. Date of the beginning of validity of the right;
13	Validity To	Date (yyyy/mm/dd)	Mandatory. Date of the end of validity of the right (9999/12/31 means perpetuity);
14	Rights	Text (fix. 2)	Mandatory. Kind of rights. For the moment, AGICOA accepts only Retransmission rights (CA by default).

4.8.1 Rights understanding

To be as precise as possible and to provide a good understanding of rights, annex E details examples of how AGICOA is interpreting rights.

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

4.9 Mandates

This record is mandatory.

The declarant must state whether he mandates AGICOA for the following:

- General Mandate – If this mandate is not given to AGICOA, then the rightsholder may not declare this work to AGICOA.
- Catch Up TV – The declarant has to indicate if he mandates AGICOA for this service.
- TV Start from the beginning – The declarant has to indicate if he mandates AGICOA for this service.
- TV Start from the beginning – The declarant has to indicate if he mandates AGICOA for this service.
- Pause and Resume – The declarant has to if he mandates AGICOA for this service.
- Preview TV – The declarant has to indicate if he mandates AGICOA for this service.
- TV Everywhere – The declarant has to indicate if he mandates AGICOA for this service.
- In Home – The declarant has to indicate if he mandates AGICOA for this service.
- Set Top Box to Set Top Box Streaming – The declarant has to indicate if he mandates AGICOA for this service.
- Network Personal Video Recorder – The declarant has to indicate if he mandates AGICOA for this service.
- Communication to the public in bars, cafes and other public areas – The declarant has to indicate if he mandates AGICOA for this service.

There must be one Mandate record for each type of mandate.

#	Data field	Format	Description
1	Record Type	Text (max. 4)	Mandatory. Fixed value = "18";
2	Work Declaration No (Sender)	Text (max.50)	Mandatory. Same as above;
3	Mandate Type	Text (max.2)	Mandatory. There must be one record for each mandate type. Types are the following: GR = General Mandate CU = Catch Up TV SB = TV Start from the beginning PR = Pause and Resume PT = Preview TV TE = TV Everywhere IH = In Home BO = Set Top Box to Set Top Box Streaming NP = Network Personal Video Recorder BA = Communication to the public in bars, cafes and other public areas Note that new mandate types might be added in the future;
4	Mandated	Text (yes/no)	Mandatory. Enter yes if you mandate AGICOA for the mandate type, no if you don't mandate AGICOA for the mandate type.

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

5 XML format

This section describes the XML tags that should be used when generating or interpreting data exchanged in XML format.

5.1 'Work Declaration' data block

The XML tag for this data block is: **Work**

The XML tags for the data element of this data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work Declaration No (Sender)	WNS	
3	Work Declaration No (Receiver)	WNR	
4	Serial Level	SL	
5	Serial No Sender	SNS	
6	Serial No Receiver	SNR	
7	Season No Sender	SnNS	
8	Season No Receiver	SnNR	
9	Season No	SnN	
10	Episode No	EN	
11	Total Season	TSE	
12	Total Episode	TEP	
13	Duration	D	
14	Type	T	
15	Kind	K	
16	Year of production	YP	
17	ISAN number	I	
18	Withdrawal	WD	

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

5.2 'Titles' data block

The XML tag for this data block is: **TtIs**

As many titles can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'Title' data blocks as need.

5.2.1 'Title' data block

The XML tag for this data block is: **Ttl**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Original	O	
4	Language Code	L	
5	Title	T	

5.3 'Countries of Production' data block

The XML tag for this data block is: **CntyPrds**

As many countries of production can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'C' data blocks as needed.

5.3.1 'C' data block

The XML tag for this data block is: **C**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Country code	-	The value will be issued without additional XML tag.

Example: If, for a given Work Declaration, the countries of production are "US", "FR" and "DE", the corresponding XML data block will be:

```
<CntyPrds>
  <C>US</C>
  <C>FR</C>
  <C>DE</C>
</CntyPrds>
```

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

5.4 'Original Languages' data block

The XML tag for this data block is: **OIngs**

As many original languages can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'L' data blocks as needed.

5.4.1 'L' data block

The XML tag for this data block is: **L**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Language code	-	The value will be issued without additional XML tag.

Example: If, for a given Work declaration, the original languages are "ENG" and "FRE", the corresponding XML data block will be:

```
<OIngs>
  <L>ENG</L>
  <L>FRE</L>
</OIngs >
```

5.5 'Interested Parties' data block

The XML tag for this data block is: **IParts**

As many interested parties can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'IPart' data blocks as need.

5.5.1 'Interested Party' data block

The XML tag for this data block is: **IPart**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Interested party Type	T	
4	Last name	L	
5	First name	F	

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

5.6 'Companies of Production' data block

The XML tag for this data block is: **CmpyPrds**

As many companies of production can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'CmpyPrd' data blocks as needed.

5.6.1 'Company of Production' data block

The XML tag for this data block is: **CmpyPrd**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Company type	T	
4	Name	N	
5	By order	O	
6	Principal	P	

5.7 'Rights' data block

The XML tag for this data block is: **Rgts**

As many rights can be defined for the same Work Declaration, this XML element should be considered as a collection containing as many 'Rgt' data blocks as need.

5.7.1 'Right' data block

The XML tag for this data block is: **Rgt**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Rightsholder Reference (Sender)	RRS	
4	Rightsholder Name (Sender)	RNS	
5	Rightsholder Reference (Receiver)	RRR	
6	Country of retransmission	C	
7	Language code	L	
8	TV Channel	Ch	
9	Percentage of right	P	
10	Rights From	RF	
11	Rights To	RT	

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

12	Validity From	VF	
13	Validity To	VT	
14	Rights Type	T	

5.8 'Mandates' data block

The XML tag for this data block is: **Mandates**

The 10 mandate types must be declared for the same Work Declaration, this XML element should be considered as a collection containing the 10 'Mandate' data blocks.

5.8.1 'Mandate' data block

The XML tag for this data block is: **Mandate**

The XML tags for the data element of this XML data block are listed below:

#	Data element name	Corresponding XML Tag	Remark
1	Record Type	-	This data element is useless in the XML file
2	Work declaration No (Sender)	-	This data element is useless in the XML file
3	Mandate type	T	
4	Mandated	M	

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

6 Examples

Example of Data

Serial Creation

WRI Data Import

Sender Declaration No	Receiver Declaration No	Serial Level	Sender Serial No	Receiver Serial No	Sender Season No	Receiver Season No	
RH-003SAX90		1					Serial
RH-003SAX91		2	RH-003SAX90				Season
RH-003SAX92		3	RH-003SAX90		RH-003SAX91		Episode at Season Level
RH-003SAX93		3	RH-003SAX90				Episode at Serial Level

Data in IRRIS

IRRIS		
Rh Work No	Declaration No	Serial Level
RH-003SAX90	D-000000012	Serial
RH-003SAX91	D-000000013	Season
RH-003SAX92	D-000000014	Episode
RH-003SAX93	D-000000015	Episode

Serial Modification (Already declared to AGICOA) Data Import

Sender Declaration No	Receiver Declaration No	Serial Level	Sender Serial No	Receiver Serial No	Sender Season No	Receiver Season No	
RH-003SAX90	D-000000012	1					Serial
RH-003SAX91	D-000000013	2	RH-003SAX90	D-000000012			Season
RH-003SAX92	D-000000014	3	RH-003SAX90	D-000000012	RH-003SAX91	D-000000013	Episode at Season Level
RH-003SAX93	D-000000015	3	RH-003SAX90	D-000000012			Episode at Serial Level

To be as precise as possible and to provide a good understanding of serials, annex F details examples of how to declare serials.

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

This section illustrates how the data will be formatted for the following declaration:

Declaration details:

Attribute	Value
Work declaration No (Sender)	My Ref #987
Work declaration No (Receiver)	D-000234567
Duration	136
Type	FF
Kind	FI
Year of production	1990
ISAN number	Unknown
Original title	Title in English: Terminator 2, Judgement day
Alternate title	Title in German: Terminator 2, Tag der Abrechnung
Alternate title	Title in French: Le jugement dernier
Country of production	US
Original language	ENG
Production companies	Carolco Pacific Western
Directors	James Cameron
Actors	Arnold Schwarzenegger Linda Hamilton Edward Furlong
Mandates	General Mandate: Yes Catch-up TV: Yes TV Start from the beginning: Yes Pause and Resume: Yes Preview TV: Yes TV Everywhere: Yes In Home: Yes Set Top Box to Set Top Box streaming: Yes Network Personal Video Recorder: Yes Communication to the public in bars, cafes and other public areas: Yes

Rights details:

Attribute	Value
Rightsholder reference	21633
Rightsholder name	EXAMPLE PICTURES
Right 1	Cablerights, Country:CH;Language:All;TV:All;Pct:100.00; Rights From 01/01/1991 to 31/12/9999; Validity from 01/01/1991 to 31/12/9999;
Right 2	Cablerights, Country:USA;Language:All;TV:All;Pct:100.00; Rights From 01/01/1991 to 31/12/9999; Validity from 01/01/1991 to 31/12/9999;
Right 3	Cablerights, Country:USA;Language:French;TV:All;Pct: 0.00 (this means that for USA, this rightholder as rights for all languages (line above), except French (this line); see Annex E for rights interpretation); Rights From 01/01/1991 to 31/12/9999; Validity from 01/01/1991 to 31/12/9999;

IRRIS Import/Export Procedure

WORK DECLARATIONS & RIGHTS

Standard data exchange - WRI 02.02

6.1 Flat file format

The flat file format is still supported for compatibility reasons and we recommend to use only the new XML format.

Remarks:

- For clarity, the field delimiter (Tab) has been replaced by " _ "
- The first line is the block header (record type = "00"), and the last line is the block footer (record type = "ZZ") as described in the "IS&T Procedure, Import / Export Process" document.

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

6.2 XML format

This newer format should be preferred because it is based on the XML format and can be processed more flexibly by many third-party tools available on the market.

Notice that, for readability, the XML data has been properly indented but in the reality, it would be more efficient to remove all the indentation to limit the volume of the XML files.

```

<?xml version='1.0' encoding='utf-8'?>

IRRIS Import/Export Procedure WORK DECLARATIONS & RIGHTS Standard data exchange - WRI 02.02

7 Versioning history

21 June 2001	Creation of the version 02.01;
21 November 2001	Add support for XML format;
24 February 2010	Change ISAN length from 17 to 26 and description;
05 November 2012	ISAN 17 is not accepted anymore;
30 March 2016	New version WRI 02.02; Year of Production, Director and Company of Production are now mandatory;
	New section regarding Mandates;
24 April 2017	Excel document for Mandates is replaced by a sentence in the header section.
February 2018	Add new voluntary services Mandates; Rename field Total Season/Episode in Total Season, and field Total1 in Total Episode (also change XML denomination of the latter from T1 to TEP); Removed obsolete fields Color, Modified, Silent, First communication Year, Basis for Claim, Continuous Production, Total 2.

8 Annexes

- Annex A: AGICOA Type and genre definition
- Annex B: AGICOA extensions to the ISO 3166_2A table
- Annex C: AGICOA extensions to the ISO 639-2B_3A table
- Annex D: AGICOA TV Channels codes
- Annex E: Examples of AGICOA rights interpretation
- Annex F: Examples of AGICOA series interpretation
